

How to Uninstall Exalate from Salesforce

Last Modified on 01/15/2026 7:27 pm EST

This article describes how to uninstall Exalate from your Salesforce work management system.

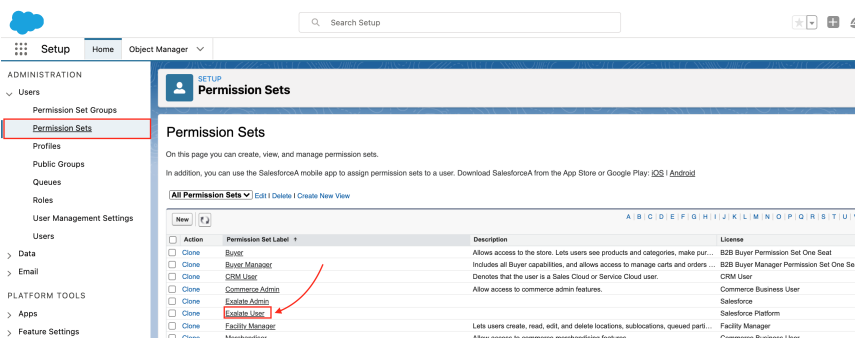

To uninstall Exalate:

1. Manage user's permissions:

1. Access the Salesforce instance and click **Setup**.

2. Go to **Users -> Permissions Sets** and click **Exalate User**.

3. Click **Manage Assignments**.

4. Select a user and click **Remove assignments**.

Add Assignments Remove Assignments

5. Go back to **Users -> Permissions Sets** and click **Exalate Admin**.

SETUP
Permission Sets

On this page you can create, view, and manage permission sets.

In addition, you can use the SalesforceA mobile app to assign permission sets to a user. Download SalesforceA from the App Store or Google Play: iOS | Android

Add Assignments Remove Assignments

2. Remove the Exalate Sync panel from the objects view:

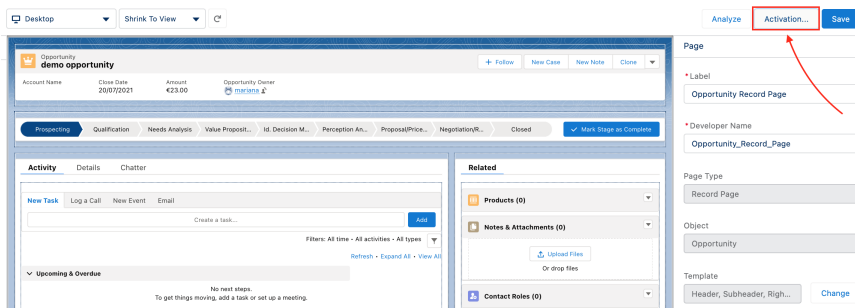

1. Open an object where you have previously added a sync panel.
2. Click **Setup -> Edit Page**.

3. Remove the sync panel by clicking a trash icon on the component and clicking **Save**.

4. Click the **Activation** button.

5. Move to the **App Default** tab and click **Remove Assignments**.

Activation: Opportunity Record Page

Custom record pages can be assigned at different levels:

-  **The org default** record page displays for an object unless more specific assignments are made.
 -  **App default** page assignment, if specified, overrides the org default.
 -  **App, record type, profile** assignments override org and app defaults.
- [Learn more about Lightning page assignment.](#)

ORG DEFAULT

APP DEFAULT

APP, RECORD TYPE, AND PROF...

Set this page as the default for Opportunity records for specific Lightning apps. An app default page displays for all the object's records in an app unless specific app, record type, and profile assignments are made.

Save

Note: You need to remove the sync panel from every object where it has been previously added.

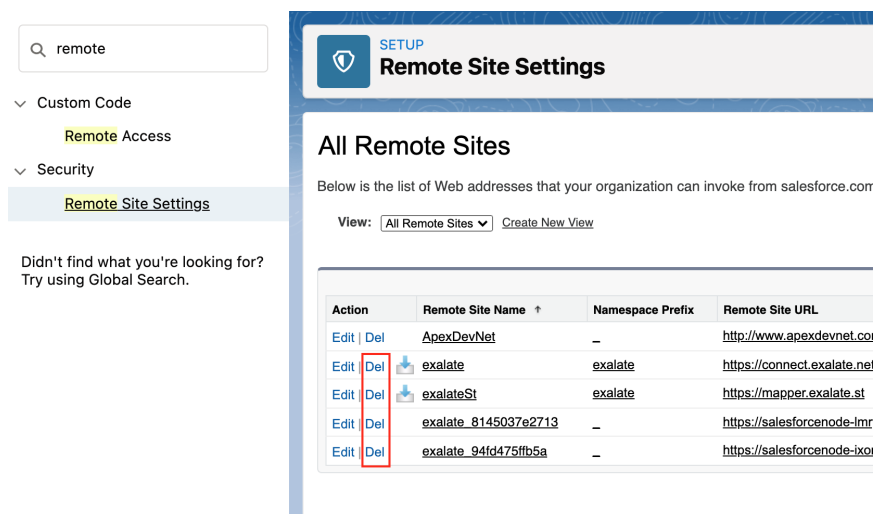

3. Remove Remote Site settings:

1. Click **Setup**

2. Type "remote" in the search field and click **Remote Site Settings**.

3. Delete all the Exalate-related settings.

4. Remove the Connected App

1. Click **Setup**.

2. Go to **Apps -> App manager** and in the list of apps find **Exalate** with the app type **Connected**.

Setup Lightning Experience App Manager

API (Enable OAuth Settings)

5. Confirm the app removal by clicking **Delete**.

Manage Connected Apps

Exalate App

Are you sure you want to delete the Exalate App app? When you delete a connected app that's part of a managed package, you can't use any previous versions of the managed package.

Buttons: Delete, Cancel

5. Remove Lightning App:

1. Go to **Setup**

2. Click **Apps** -> **Packaging** -> **Installed Packages**.

Setup Installed Packages

On AppExchange you can browse, test drive, download, and install pre-built apps and components right into your salesforce.com environment. [Learn More about Installing Packages](#)

Apps and components are installed in packages. Any custom apps, tabs, and custom objects are initially marked as "In Development" and are not deployed to your users. This allows you to test and customize before deploying the components individually using the other features in setup or as a group by clicking Deploy.

Depending on the links next to an installed package, you can take different actions from this page.

To remove a package, click Uninstall. To manage your package licenses, click Manage Licenses.

Action	Package Name	Publisher	Version Number	Namespace Prefix	Install Date	Limits	Apps	Tabs
Uninstall	ExalateBridgeApp	Exalate	0.6	exalate	30/09/2021, 10:11	✓	1	1

Uninstalled Packages

No uninstalled package data archives

3. Click **Uninstall** next to the **ExalateBridgeApp**.
