Accept the Connection Invitation in Script Mode for Jira On-premise

Note: To accept the Connection invitation you need an **Invitation Code.** The **Invitation Code** includes **pre-populated** Connection details such as Connection name, instance short names, and Destination instance URL. You are only required to finish the configuration by accepting the invitation.

Accept the Connection Invitation in Script Mode from Jira On-premise

1. Navigate to the **Connections** tab in the Exalate console.

Click **Settings → Apps** & click **Connections** under the **Exalate** menu.
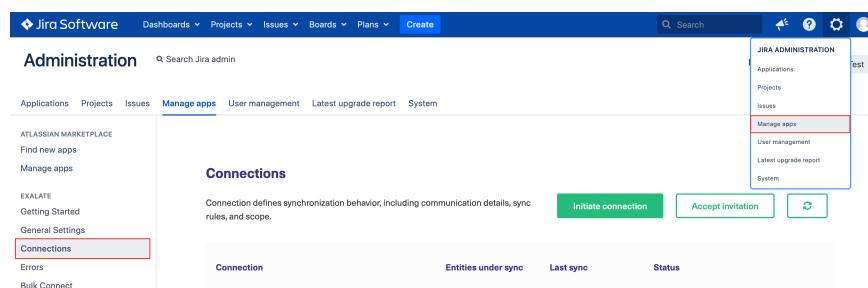

2. Click **Accept the invitation.**
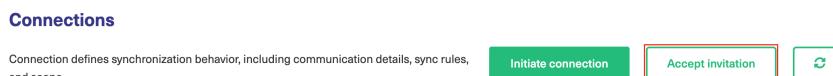

3. Paste the invitation code.

Paste the invitation code that you received from the other side.

And click **Next**.

Accept Invitation ✕

Please paste the invitation code, received from your partner

Enter the invitation code

Next

8. Select a project where you would like to sync issues received from the other side.

And click **Confirm**.

Accept invitation ✕

Select a project for the incoming sync

Exalate generates default sync rules to synchronize basic issue fields. You can adapt the sync rules later. By default the following
issue data will be synchronized: summary, description, comments, labels and attachments.

Please select the project where you want to create entities, received from the other side.*

Select Project ⌄

‹ Previous   Confirm

Congratulations! The connection is set up.

Initiate connection ✕

Congratulations!

company A   company B

Connection is established.

Configure Sync

What's Next?

After accepting the connection invitation proceed to configure the connection. Remember, with Exalate you need to set up the configuration for both integrating sides independently, depending on your integration requirements.
