

How to sync issues automatically using Exalate API in Jira On-premise

Last Modified on 01/15/2026 4:57 pm EST

This article shows how to start issue synchronization automatically with the help of Exalate API.

Sync an issue according to the specified issue key

```
1 def exaCl = com.atlassian.jira.component.ComponentAccessor
2   .pluginAccessor
3   .getEnabledPlugin("com.exalate.jiranode")
4   .getClassLoader()
5 def exaSyncServiceClass = exaCl.loadClass(
6   "com.exalate.api.trigger.ISyncInitiationService"
7 )
8 def syncService = com.atlassian.jira.component.ComponentAccessor.getOSGiComponentInstanceOfType(
9   exaSyncServiceClass
10 )
11 syncService.pair(
12   "PROJ-23", // specify the issue key you want
13   "ConnectionTest" // set the relevant connection name
14 )
```
