

Basic Object Types

Last Modified on 01/30/2026 1:38 pm EST

Basic types are atomic types without subfields.

Type	Comment
String	The <code>java.lang.String</code> data type is an array of characters with a maximum length of $2^{31}-1$.
Long Product	The <code>long</code> data type is a 64-bit two's complement integer. The signed long has a minimum value of -2^{63} and a maximum value of $2^{63}-1$.
Date	About Us Release History Glossary API Reference Security Represents a specific instant in time, with millisecond precision. Should be UTC based, but might differ from server to server.
