

getUser

Last Modified on 01/15/2026 4:37 pm EST

Note: For the method to work on Azure DevOps, make sure that the user is part of the team that has access to the Azure DevOps project.

Signature

Helper	nodeHelper
Signature	<p>Jira Server: <code>getUser(String userKey)</code></p> <p>Jira Cloud: <code>getUser(String accountId)</code></p> <p>Azure DevOps:</p> <p><code>getUser(String userKey),</code> <code>getUserByUsername(username: String)</code> is the same as <code>getUserByFullName(username: String)</code></p> <p>Salesforce: <code>getUser(String userKey)</code></p>
Description	Returns a user object Null in case the user is not found
Introduced in	0.8

Note: The Signature introduced in 0.8 works for Azure Devops until version 5.4.0.

Example use

[Product](#)
Set the local issue assignee based on the remote issue assignee using the method.
