

stripHtml

Last Modified on 01/15/2026 4:17 pm EST

Signature

Helper	nodeHelper
Signature	<code>stripHTML(String HTMLText)</code>
Description	Removes the HTML from the text
Introduced in	

Example use

By default, text fields on the Azure DevOps, Freshdesk and Freshservice side have HTML tags. Use this method to remove HTML tags from any text fields when syncing.

Remove the HTML tags from the description

```
replica.description = nodeHelper.stripHtml(issue.description)
```

Example Usage in Freshdesk / Freshservice

- **Removing HTML Tags from a Description Field:**

```
replica.description = nodeHelper.stripHtml(entity.description)
```

Product

- **Stripping HTML from a Hardcoded String:**

[About Us](#)

[Release History](#)

```
String description = "<p>Some description</p>"
```

```
String descriptionWithoutHtml = nodeHelper.stripHtml(description)
```
