

How to sync story points field

Last Modified on 01/15/2026 3:22 pm EST

In Jira, story points are implemented via a custom field called "Story Points". You can sync JIRA Story Points field as a simple text field.

Important: Make sure that you have Story Points field on both sides.

Warning: Despite our best efforts, code can change without notice due to a variety of factors. If you encounter an issue in any of the code shown here and find that a specific block of code is not correct, or is causing errors, please check with the [Community](#) to find an updated version.

Source side

Add the code below into the **Outgoing sync** to send Story Points field data

Data Filter

```
1 replica.customFields."Story Points" = issue.customFields."Story Points"
```

Destination side

Incoming sync

add synced Story Points field data

```
1 issue.customFields."Story Points".value = replica.customFields."Story Points".value
```
