

# Search Limit on GitHub

Last Modified on 01/15/2026 3:07 pm EST

## Problem

When you do **Bulk Exalate** on a trigger in GitHub and you have more than 1000 issues, not all issues are synchronized.

It seems there is no indication that your search has hit this limit - there is no exception or error.

## Cause

Due to the limitation of the GitHub API, the search is limited to 1000 issues.

This is a [known issue on GitHub](#).

It affects the Bulk Exalate operation if there are more than 1000 items fitting the search query you use to synchronize issues.

## Solution

**Product**  
Modify the search query to select a subset of issues. For example, you can add a [date parameter](#) to the query.
