Azure DevOps - Version 5.0.21

Last Modified on 01/15/2026 12:17 pm EST

Released for AZURE DEVOPS on **Nov 6, 2020**

Exalate has new scripts to convert between Jira Cloud Markdown and Azure DevOps HTML. It makes syncing text, images, lists, tables, links, and comments easier. We also updated our UI, and made various bug fixes.

In this release

Improvements

EXACOMP-802	Now you can convert from Jira Cloud Markdown to Azure DevOps HTML and vice versa. This simplifies syncing text, images, lists, tables, links, and comments
EXACOMP-850	Improved performance of Clean-up tools
JCLOUD-1484	Improved triggers performance
EXACOMP-842	Connections list in Clean-up tools now loads faster

Bug fixes

EXACOMP-862	Fixed bug with issue attachments not synced in private to public connections
ADNODE-246	Fixed bug with error appearing when deleting images in connections between Jira Cloud and Azure DevOps
EXAEDIT-1081	Fixed Copy invitation code alignment in Safari
ZENDESK-263	Fixed bug with repeated sync in connections from Zendesk to Jira
EXACOMP-571	Fixed bug with Work item field highlighted as an error when doing a Clean-up
EXACOMP-715	Fixed bug with data, attachments, and comments not syncing in Bulk connect
EXACOMP-838	Fixed problem with blank page showing up in Connection section during connection errors

UI updates

EXACOMP-817	Updated Subscribe to Exalate section
