Azure DevOps - Version 5.16.0

Last Modified on 01/15/2026 12:07 pm EST

Released for Azure DevOps on September 9, 2024

AI-Generated Scripts Based on User Prompts

We're excited to introduce a powerful new feature in Exalate!
Now, you can generate scripts effortlessly using AI technology. With AI-Generated Scripts, users can create custom sync scripts by simply providing a prompt. This feature streamlines the script creation process, reduces manual coding efforts, and offers quicker, smarter script generation tailored to your needs. Whether you're a beginner or an advanced user, this new AI tool simplifies customisation, allowing you to focus more on optimising your workflow.

Key Benefits:

- Faster script generation based on your input.
- Reduced manual coding and error-prone configurations.
- Tailored, intelligent responses for more efficient syncs.

New features:

- XLT-5574 - AI-Generated Scripts Based on User Prompts;
- XLT-5576 - Multiple interactions with AI Service;
- XLT-5782 - [AI-Service] Notification about prompt processing;
- XLT-5750 - Track and Store Script Status in AI Database;
- XLT-5575 - AI Feature Disclaimer.

Bug fixes

- XLT-5752 - GSP feature highlights half of the Entity Sync status screen;
- XLT-5166 - Clean up by remote entity and Clean up all synchronisation info is available on Clean-up Tools page;
- XLT-5398 - Trigger Validation Error due to JQL Request Timeout.

Improvements

- XLT-5747 - Generate an informative and well-structured page whenever the embedded node has been archived.
