Azure DevOps - Version 5.24.3

Last Modified on 01/15/2026 12:12 pm EST

Released for Azure DevOps on May 6th, 2025

This release introduces a new integration between Exalate's Core system and SyncRoom - a new way to manage cross-company integrations from a single, unified console.

Learn more about SyncRoom and how it enhances your Exalate experience here.

Improvements

- SYN-3 - Added node administrator approval flow;
- SYN-141 - Implemented initial onboarding support for SyncRoom.
