GitHub - Version 5.4.6

Last Modified on 01/15/2026 10:37 am EST

Released for GITHUB on **November 24, 2022**

In this release, we've introduced new Exalate branding. We have also added some improvements and bug fixes.

In this release

Improvements

- CNSL-2 Introduced new Exalate branding
- CNSL-31 Added an info message when deleting a trigger from a connection

Bug fixes

- XLT-823 Fixed the error in the Bulk Exalate operation

- XLT-824 Fixed the eternal loader issue while performing Bulk Exalate

- XLT-825 Fixed the issue with the list of repos not being displayed while creating a connection

- XLT-826 Fixed the issue with setting a full repo name instead of a name

- XLT-830 Fixed the issue with the repo not being a part of a script after upgrading the Basic connection to the Script connection

- XLT-831 Fixed the issue where comments on pull requests were syncing as separate issues on Jira

- XLT-973 Fixed the sync rules error during Bulk Exalate

- CNSL-56 Improved user interaction when deleting a connection
