

HP ALM/QC - Version 5.0.10

Last Modified on 01/15/2026 9:46 am EST

Released for HP ALM/QC on **Jan 12, 2020**

From now on, you will receive a verification link when registering an instance. This makes it easier to finish the evaluation process and create an Exalate proxy user account. Besides, this feature also improves security. We also improved the general performance of Exalate, made various interface updates, and bug fixes

You can download the latest version of Exalate for HP ALM/QC at the [HP ALM/QC: Download page](#).

In this release

Improvements

| | |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| HPQCNODE-962 | We updated the process of registering an Exalate instance. From now on, you will receive a verification link to your email. This simplifies the getting an evaluation license and creating an Exalate admin account. Also, this feature improves security |
| EXACOMP-979 | Improved performance by reworking the data storage mechanism |
| EXACOMP-972 | Implemented lazy loading. This improves performance by not overloading memory with data |
| EXACOMP-967 | Added possibility to access customer monitor |
| EXACOMP-789 | Improved general load time by updating the codebase |

Bug fixes

| | |
|--------------|-------------------------------------------------------------------------------------|
| HPQCNODE-964 | Fixed bug with sessions overloading after an unsuccessful logout |
| HPQCNODE-949 | Fixed bug where it wasn't possible to sync more than 100 entities with Bulk Exalate |

| | |
|--------------|---------------------------------------------------------------------------------|
| EXACOMP-922 | Fixed bug with pop-up alignment when going to an error from the Connections tab |
| SNOWNODE-275 | Fixed bug where only one entity was shown as synced in Bulk Connect operations |
| EXAEDIT-1186 | Fixed bug with license limitation showing incorrectly in Bulk Exalate |

UI updates

| | |
|-------------|-----------------------------------------------------------------------------|
| EXACOMP-285 | Updated the look of the License Details section |
| EXACOMP-787 | Updated the notification after making a Bulk Connect |
| EXACOMP-964 | Bulk Connect and Triggers tabs load faster |
| EXACOMP-621 | Removed the template selection for script connections |
| EXACOMP-798 | Added placeholders to If clauses in triggers and Destination Instance field |
