

Connection Details Overview

Last Modified on 01/15/2026 9:26 am EST

The **Connection Details** page gives you a comprehensive view of everything happening within a specific connection, on both sides.

How to Access

You can open the Connection Details page in two ways:

- From the **Connections list**, click the three-dot action button next to a connection and select **View connection details**.
- From the **connection configuration page**, click the **View connection details** button in the three-dot action menu.

The screenshot shows the 'Azure Prod → Jira Cloud' connection details. The 'Triggers' section has 'View connection details' highlighted. The 'Scripts' section shows an 'Outgoing script' and an 'Incoming script'. The 'Incoming script' code is:

```
1 if (firstSync) {  
2   issue.projectKey = "KAN"  
3   // Set the same issue type as the source issue. If not found, s  
4   issue.typeName = nodeHelper.getIssueType(replica.type?.name,
```

What You'll Find Here

The page provides detailed insights into both sides of the connection:

- Connection Status
- Number of synced pairs
- Node status and node version
- System and node URLs
- Sync queue monitoring

The screenshot shows the 'Connection Details' page for a connection named 'mariana-barcelona_to_mariana-malaga'. The page is divided into two main sections: 'Azure Prod' and 'Jira Cloud'. Each section has a 'Node Overview' box and a 'Sync Queue' box. The 'Node Overview' box contains fields for 'Issue Tracker URL', 'Node URL', 'Node Status', and 'Node Version'. The 'Sync Queue' box shows counts for 'Items' and 'Files' for both upload and download directions. A 'Feedback' button is located on the right side of the page.

Additional Tools

From this page, you can also:

- **Generate logs** for each node
- **Export entity key relation files** for further analysis or troubleshooting

The Connection Details page is your go-to spot for troubleshooting, validation, and monitoring every **Product** that flows between your integrated systems.
